

Database Catalogue 1993

DIALOG

Prices included in this catalogue may differ in each country and are **effective ONLY for the month of January 1993. All prices are subject to change.** Contact your local Dialog representative for prices in your area.

Volume purchase

Savings on DIALOG services, calculated as a percentage of expenditure on connect time, TYPEs, PRINTs, Dialog AlertsSM, and other services. Savings increase as your cumulative expenditure throughout the year increases. Participating accounts must incur minimum expenditure of \$5000 annually. For more information, please contact Dialog Sales.

The DIALOG[®] Service

The DIALOG Information Retrieval Service, from Dialog Information Services, Inc., has been serving users since 1972. With over 400 databases from a broad scope of disciplines, it is truly the one-stop service for all of your information needs.

Contained in the DIALOG information collection are millions of documents drawn from more sources than any other online service—from scientific and technical literature—from full-text trade journals, newspapers, and newswires. There's more too...details on millions of chemical substances, information on patents issued worldwide, demographic data, and company financial statistics. Compiled from the world's most respected and authoritative information sources, DIALOG can provide you instant answers from just one source.

DIALOG information bridges a huge span of subject areas ranging from news and travel to scientific research and patents. Major areas of focus are:

- Agriculture, Food, and Nutrition
- Biosciences and Technology
- Business News and Information
- Chemistry
- Company Information and Financial Data
- Computers and Software
- Energy and Environment
- Engineering
- Government and Public Affairs
- Industry Analysis
- Law
- Medicine, Health Care, and Drug Information
- News and Complete-Text Publications
- Patents, Trademarks, and Copyrights
- People, Books, and Consumer News
- Physical Science and Technology
- Social Sciences and Humanities
- Travel

Search modes. DIALOG offers you two search options to access information: menus and commands.

DIALOG MenusSM is ideal for those new to online searching—or for searching databases that you use infrequently.

DIALOG Commands provide the fastest and most precise way to search for information. The powerful, yet flexible search system allows instant retrieval of just the information you need.

Using the DIALOG Database Catalogue...

This catalog provides the most salient information you need about the hundreds of databases on the DIALOG system.

Subject guide. The introductory section provides a broad subject grouping of DIALOG databases. More specific subject categories can be viewed in the DIALINDEX®/OneSearch® section at the back of the catalog.

Database descriptions. Organized alphabetically by database name, this major part of the catalog gives a brief description of the wealth of information to be found in any one source. Be sure to consult the key on page 17 before reading the database descriptions.

DIALINDEX®/OneSearch® categories. To assist in finding just the right database for the information you need, special database collections or categories have been predefined by subject coverage. Simply select the subject category of your choice and you're ready to begin searching.

Databases by file number. This handy list presents you the listing of DIALOG databases organized by file number or acronym.

Special Options for Your Information Needs...

DIALOG BUSINESS CONNECTION® (DBC)

A menu-access service designed to provide fast, clear-cut answers to a variety of business questions, DBC is organized around seven separate applications: 1) world-wide corporate intelligence, 2) U.S. financial screening, 3) products and markets, 4) worldwide sales prospecting, 5) travel planning, 6) DIALOG Business News Flash, and 7) DIALOG AlertSM Service.

DIALMAIL®

DIALMAIL is the easy-to-use electronic mail service from DIALOG that allows you to communicate with Dialog staff, database producers, and other DIALOG users. DIALMAIL also provides immediate delivery of prints via your electronic mailbox.

DIALOG AlertSM

An automatic current awareness service, DIALOG Alert provides continuous, up-to-date information on just the topics you specify.

DIALORDER®

An online document ordering service, DIALORDER allows you to request copies of original publications from a wide variety of document suppliers.

Other DIALOG Special Features and Services

DIALINDEX®

A database selection tool, DIALINDEX allows you to search many databases at a time in order to determine which files have the most information on your specific topic.

OneSearch®

A unique DIALOG system feature, OneSearch enables you to search and display records from multiple databases at one time.

DIALOG OnDisc®

The DIALOG OnDisc® product line provides databases on CDROM in a range of fields, including business, law and government, health and biomedicine, science and technology, and education. CDROM products that correspond to online files are listed in this catalog in the Database Descriptions section by the name of the online file (see the key, page 17), and those CDROM products available from Dialog only

on CDROM can be found in the Database Descriptions section under the name DIALOG OnDisc®....

DIALOGLINK®

DIALOGLINK is Dialog's custom communications software offering enhanced access to DIALOG services. Designed for users of IBM or IBM-compatible micro-computers, it features automatic logon, search creation before logon, marking and redisplaying information, saving records to disk, cost tracking, and viewing images.

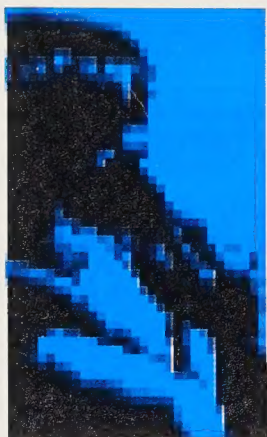

Special Output Options

REPORT

REPORT lets you choose just the data you want from individual records and organize it into concise tables. It simplifies the preparation of telemarketing lists, comparisons of financial data, and other tabular displays that can then be exported to spreadsheet programs for further analysis and manipulation.

Viewing Images

Dialog offers the capability of viewing images from certain databases using the DIALOGLINK software. Images currently available for viewing include trademark images from TRADEMARKSCAN®—U.S. FEDERAL and chemical images from CHAPMAN AND HALL CHEMICAL DATABASE.

To Assist You...

CUSTOMER SUPPORT

For assistance with any problem concerning logon or search procedure, Dialog provides a toll-free customer hotline within the U.S. and Canada. For search assistance from other countries, contact your local Dialog representative.

TRAINING

For new users, full-day and half-day introductory seminars are available, as are self-instructional training tools. For information professionals with specific information needs, a number of specialized training programs are offered that cover business, chemistry, patents, government, and legal research.

DOCUMENTATION

Dialog offers a full range of supporting literature ranging from individual Reference Guides for most databases to a complete guide to the DIALOG search system, entitled *Searching DIALOG: The Complete Guide*. In addition, Dialog provides several online databases and extensive online HELP messages to assist the user at any point in the search process.

Each database is individually priced; search costs depend upon the amount of time a user is connected to the service. See the Database Descriptions section for details on pricing for each database. **PLEASE NOTE: Prices given in this catalog are effective for the month of January 1993 ONLY. Prices are subject to change.**

Contact DIALOG Marketing at 800-3-DIALOG (800-334-2564) for more information about other Dialog services. From outside the U.S. and Canada, contact your local Dialog representative.

ABI/INFORM®

File 15
Menu

Coverage: August 1971 to the present

Updates: Weekly

Data Type: Bibliographic

Provider: UMI/Data Courier, Louisville, KY

ABI/INFORM® is designed to meet the information needs of executives and covers all phases of business management and administration. ABI/INFORM stresses information that is applicable to many types of businesses and industries. Specific product and industry information is included, but is not of primary emphasis. Approximately 800 primary publications in business and related fields are currently scanned for inclusion in ABI/INFORM. In addition to bibliographic records that contain informative abstracts, ABI/INFORM now also includes the full text of hundreds of articles.

ACADEMIC INDEX™

File 88
Menu

Coverage: 1976 to the present

Updates: Monthly

Data Type: Bibliographic

Provider: Information Access Company, Foster City, CA

ACADEMIC INDEX (AI), produced by Information Access Company, provides indexing of more than 1,450 scholarly and general interest publications. Coverage represents the most commonly held titles in over 120 college and university libraries. ACADEMIC INDEX expands the coverage found in its sister file, MAGAZINE INDEX™, File 47, by providing information in the areas of the social sciences and the humanities. ACADEMIC INDEX includes indexing and abstracts (beginning in 1991) for articles, news reports, editorials on major issues, product evaluations, biographies, short stories, poetry, and reviews.

The file is updated monthly with records first being added to NEWSEARCH™, File 211. The subject coverage of ACADEMIC INDEX includes the following general areas: art, anthropology, economics, education, ethnic studies, government, history, literature, political science, general science, psychology, religion, sociology, and leisure.

ACCOUNTING & TAX DATABASE

File 485

Coverage: August 1971 to the present

Updates: Weekly Data

Type: Bibliographic, Complete-text

Provider: UMI/Data Courier, Louisville, KY

The ACCOUNTING & TAX DATABASE provides comprehensive indexing and informative abstracts of articles in prominent accounting, taxation, and financial management publications from the United States and other countries. Subjects covered include accounting, auditing, banking, bankruptcy, compensation, consulting, finance, fiscal policy, and taxation. Selected records feature the full text of the source article.

AEROSPACE DATABASE

File 108
Menu
CDROM

Coverage: 1962 to the present

Updates: Twice a month

Data Type: Bibliographic

Provider: American Institute of Aeronautics and

Astronautics/Technical Information Service
(AIAA/TIS), New York, NY

AEROSPACE DATABASE provides references, abstracts, and controlled-vocabulary indexing of key scientific and technical documents, as well as books, reports, and conferences, covering aerospace research and development in over 40 countries, including Japan, Eastern Europe, and Russia. This database supports basic and applied research in aeronautics, astronautics, and space sciences, as well as technology development and applications in complementary and supporting fields such as chemistry, geosciences, physics, communications, and electronics. The AEROSPACE DATABASE combines in one database two publications: *Scientific and Technical Aerospace Reports* (STAR), produced by the National Aeronautics and Space Administration (NASA), and *International Aerospace Abstracts* (IAA), produced by AIAA under contract to NASA.

The AEROSPACE DATABASE is available only in the United States and Canada. Access by non-U.S. governments, organizations, or persons acting on their behalf is not allowed without written approval of the American Institute of Aeronautics and Astronautics, Technical Information Service.

AGELINE™

File 163
Menu

Coverage: 1978 to the present (selected coverage back to 1966)
Updates: Bimonthly
Data Type: Bibliographic
Provider: American Association of Retired Persons,
Washington, DC

The AGELINE™ database is produced by the American Association of Retired Persons (AARP) and provides bibliographic coverage of social gerontology — the study of aging in social, psychological, health-related, and economic contexts. The delivery of health care for the older population and its associated costs and policies is particularly well covered, as are public policy, employment, and consumer issues. Literature covered is of interest to researchers,

health professionals, service planners, policymakers, employers, older adults and their families, and consumer advocates. Journal citations compose roughly two-thirds of the database, with the rest devoted to citations for books, book chapters, and reports. An original, informative abstract accompanies each citation. Documents are indexed using the *Thesaurus of Aging Terminology*. There is no print equivalent of the database.

AIDSLINE™

File 157
Menu

Coverage: 1980 to the present

Updates: Monthly

Data Type: Bibliographic

Provider: U.S. National Library of Medicine, Bethesda, MD

AIDSLINE™, produced by the U.S. National Library of Medicine (NLM), contains records representing the scientific literature concerning AIDS (Acquired Immunodeficiency Syndrome). The references in AIDSLINE cover the clinical and research aspects of the disease, epidemiology, and

health policy issues. AIDSLINE is indexed using NLM's controlled vocabulary, MeSH® (Medical Subject Headings). An online thesaurus is available to aid in locating MeSH terms. Abstracts, which are taken directly from the published articles, are included for over 55% of the records. Approximately 10,000 records are added per year; over 87% of the articles represented in these 10,000 records are written in English. AIDSLINE includes indexing to selective articles from over 4,000 journals published in over 70 countries, as well as selected records from abstracts of papers presented at meetings, symposia reports, dissertations, monographs, government reports, and audiovisuals.

ASI (*American Statistics Index*) is a comprehensive index of the statistical publications from more than 500 U.S. federal offices and regional issuing agencies. ASI provides abstracts and indexing of all federal statistical publications, including non-GPO publications, which contain social, economic, demographic, or natural resources data. It also covers a selection of their publications with scientific and technical data. Types of statistical data found in ASI include: population and economic censuses; international trade data; Consumer Price Index reports; unemployment statistics; agricultural data on production, yield, prices, etc.; vital statistics; educational data; and much more.

ASIA-PACIFIC

File 30

Coverage: 1985 to the present

Updates: Biweekly

Data Type: Bibliographic

Provider: Aristarchus Knowledge Industries, Seattle, WA

The ASIA-PACIFIC database covers the business, economics, and new industries of the Pacific Rim nations, including East Asia, Southeast Asia, the Indian Subcontinent, the Middle East, Australia, and the Pacific Island nations. Records are of two types: 1) main records consisting of abstracts or citations for journal articles and other publications, and 2) company thesaurus records. Detailed abstracts are provided for selected journal articles, monographs, selected papers in conference proceedings, dissertations, and government documents. Shorter citations with briefer indexing are provided for a wide variety of journal articles, newspapers, government documents, and annual report publications. ASIA-PACIFIC also includes an extensive Corporate Thesaurus subfile, which provides detailed coverage of the corporate players in the Pacific Rim, including thousands of companies traded on the rapidly emerging stock exchanges of Southeast and East Asia.

BEILSTEIN ONLINE**File 390**

Coverage: 1779 to the present

Updates: Periodic

Data Type: Directory

Provider: Beilstein Institute, Heidelberg, Germany

BEILSTEIN ONLINE is the database version of Beilstein's *Handbuch der Organischen Chemie*, more often referred to as the *Beilstein Handbook*, plus a file of unevaluated chemical data not yet in the *Handbook*, referred to as "short file" data. The *Beilstein Handbook* is the world's most extensive collection of data on known organic compounds, including heterocyclics, isocyclics, and acyclics. Data commonly covers constitution and configuration, natural occurrence and isolation, preparation data, structural

and energy data for molecules, physical properties, chemical reaction data, characterization and analysis, and salts and addition compounds. A unique feature of the database is the ability to define reactants and products. BEILSTEIN ONLINE increases the utility of the data found in the hard-copy by providing searchable chemical structures; chemical names; physical properties, such as boiling point and relative density; chemical properties, preparation data, etc. Virtually every data field included in BEILSTEIN ONLINE may be searched.

BIOGRAPHY MASTER INDEX File 287 Menu

Coverage: Current edition
Updates: Annual
Data Type: Directory
Provider: Gale Research Inc., Detroit, MI

BIOGRAPHY MASTER INDEX (BMI) is a master key to biographical information on over 3,000,000 persons who have distinguished themselves in hundreds of fields. BMI indexes approximately 630 biographical dictionaries and directories, including current works such as *Who's Who in America* and *The International Authors and Writers Who's Who*, as well as such retrospective sources as *Medieval Women Writers* and the *Biographical Dictionary of American Science, 17th-19th Centuries*. Each BMI record provides the person's name, the birth and death dates (when known), and the titles of source books that provide complete biographical sketches on the person. The database corresponds to the Gale Research Inc.'s eight-volume publication, *Biography and Genealogy Master Index* (2nd edition, 1980), its annual updates, and a similar microfiche product known as *Bio-Base*.

BIOSIS PREVIEWS®

Files 5, 55
Menu

Coverage: 1969 to the present
Updates: Weekly
Data Type: Bibliographic
Provider: BIOSIS®, Philadelphia, PA

BIOSIS PREVIEWS® contains over 8.3 million citations from *Biological Abstracts*® (BA), *Biological Abstracts/RRM*® (Reports, Reviews, Meetings (BA/RRM)), and *BioResearch Index*® (BioI), the major publications of BIOSIS® (BA/RRM is the successor to BioI beginning in 1980.) Together, these publications constitute the major English-language service providing comprehensive worldwide coverage of research in the biological and biomedical sciences. *Biological Abstracts* includes approximately 280,000 accounts of original research yearly from nearly 7,600 primary journal and monograph titles. BA/RRM includes an additional 260,000 citations a year from meeting abstracts, reviews, books, notes, letters, selected institutional and government reports, and research communications. U.S. patents are included from 1986 through 1989. Abstracts are available for records from the *Biological Abstracts* portion of the database starting with Vol. 62, July 1976 and for book synopses in BA/RRM starting in 1985. Most BA/RRM records do not contain abstracts; no BioI records contain abstracts.

BOOK REVIEW INDEX

File 137 Menu

Coverage: 1969 to the present

Updates: 3 times per year

Data Type: Bibliographic

Provider: Gale Research, Inc., Detroit, MI

BOOK REVIEW INDEX (BRI) contains references to more than 2,000,000 reviews of approximately 1,000,000 distinct book and periodical titles. The file dates from 1969 to the present and covers every review published in nearly 500 periodicals and newspapers. Each record includes the author and title of the work being reviewed, journal name, date of review, and page number. Document type indications are also included if the work is a children's book, periodical, children's periodical, young adult periodical, reference work, or young adult book. BOOK REVIEW INDEX corresponds to the print publication of the same name. Approximately 500 periodicals and newspapers are

currently indexed by BRI (retrospective coverage varies). Periodicals indexed range from the *Harvard Business Review* to the *Center for Children's Books: Bulletin*, and from the *American Scholar* to *Psychology Today*. General interest magazines such as *Ms.*, *Time*, *The New Yorker*, and *Atlantic* are covered, as are specialized periodicals like *Flying*, *Yachting*, and *National Genealogical Society Quarterly*.

 BETI: 1950 to the present
Updates: BEI, Quarterly;
 BETI, Annually
Data Type: Bibliographic
Provider: University of Leeds, Leeds, U.K.

BRITISH EDUCATION INDEX (BEI) is the database equivalent of the print *British Education Index*. (BEI) and the microfiche *British Education Theses Index* (BETI). BEI contains the subject descriptions of, and bibliographic references to, significant journal literature relating to education and the teaching of curricular subjects, while BETI similarly indexes thesis literature. The database covers all aspects and fields of education from preschool to adult and higher education, normally qualified by age or educational levels. The range of interest within indexed journals results in broad subject and geographical coverage. The following are some of the topics covered: cognitive development, computer-assisted learning, curriculum, educational policy, educational psychology, educational technology, English (second language), language acquisition, management in education, multicultural education, physical education, science education, special educational needs, and teacher education.

BRITISH OFFICIAL PUBLICATIONS File 227 (HMSO)

Coverage: 1976 to the present
Updates: Monthly
Data Type: Bibliographic
Provider: HMSO Bibliographic Services, London, England

The BRITISH OFFICIAL PUBLICATIONS (HMSO) database contains bibliographic records of United Kingdom parliamentary, regulatory, and non-parliamentary government and official documents published by Her

Majesty's Stationery Office. Also included are publications from the British, European, and international organizations for which HMSO is the U.K. agent. The database contains records from 1976 to the present, with the exception of periodical parts from 1984 to October 1988. HMSO publications cover a wide range of subject areas, corresponding to the responsibilities of the government or other official bodies producing the documents. Parliamentary material covers a similar subject range. Publications from the organizations for which HMSO is the U.K. agent reflect the interests of those bodies. The database is derived from catalog records produced by HMSO's Bibliographic Services.

BUYER'S GUIDE TO MICRO SOFTWARE (SOFT) **File 237** **Menu**

Coverage: Current
Updates: Monthly
Data Type: Directory
Provider: Online, Inc., Weston, CT

The BUYER'S GUIDE TO MICRO SOFTWARE (SOFT) database, produced by Online, Inc., is a directory of business and professional microcomputer software available in the United States. It provides directory, product, technical, and bibliographic information on leading software packages, integrating this information into one succinct composite record. The database can help professionals locate suitable packages compatible with specified hardware without sifting through large numbers of records. The file is highly selective, listing packages rated at least "good" by the technical press, all packages from major software producers even if negatively reviewed, and packages unique to specific business segments, with special emphasis placed on library and medical software. Each record includes directory information, technical specifications including required hardware and operating systems, an abstracted product description, and, when available, a full citation to representative reviews. Different points of view are reflected by multiple reviews. Reviews carry brief abstracts and evaluative comments. Controlled vocabulary is used to index the application field.

Provider: CAB International, Farnham Royal, Slough, U.K.

CAB ABSTRACTS is a comprehensive file of agricultural and biological information and contains all records in the 26 main abstract journals published by Commonwealth Agricultural Bureaux. Over 8,500 journals in 37 different languages are scanned for inclusion, as well as books, reports, theses, conference proceedings, patents, annual reports, and guides. In some cases, less accessible litera-

ture is abstracted by scientists working in other countries. About 130,000 items are indexed each year. Significant papers are abstracted, while less important works are reported with bibliographic details only. The journals included in CAB cover the following subjects: agricultural engineering, animal breeding, animal disease, arid lands, dairy science, forestry, forest products, horticulture, nutrition, veterinary science, entomology, plant breeding, plant pathology, rural recreation and tourism, soils and fertilizers, weeds, world agricultural economics, and more. File 50 contains records from 1984 forward; File 53 contains records from 1972-1983.

CANADIAN BUSINESS AND CURRENT AFFAIRS

**File 262
Menu
CDROM**

Coverage: July 1980 to the present
Updates: Monthly
Data Type: Bibliographic
Provider: Micromedia Ltd., Toronto, Ontario, Canada

CANADIAN BUSINESS AND CURRENT AFFAIRS (CBCA) provides indexing to over 100,000 articles per year appearing in more than 500 Canadian business periodicals and 10 newspapers. From 1986 forward, event- and activity-related corporate filings deposited with the Ontario Securities Commission (OSC) are also included. From the business perspective, the file provides descriptive annotations on a wide range of company, product, and industry information. From the current affairs perspective, the database covers significant national, provincial, and local news, editorials, selected letters to the editor, government activities, labor news, crime, sports, obituaries, biographies, and reviews.

CANCERLIT®

File 159
Menu

Coverage: 1963 to the present

Updates: Monthly

Data Type: Bibliographic

Provider: U.S. National Cancer Institute, Bethesda, MD

CANCERLIT® is a comprehensive bibliographic database containing citations and abstracts of published cancer literature selected from more than 3,500 biomedical journals, meeting proceedings, books, reports, and doctoral theses. Topics covered include: all aspects of experimental and clinical cancer therapy; information on chemical, viral, and other agents that cause cancer; mechanisms of carcinogenesis; biochemistry, immunology, physiology, and biology of cancer, and both *in vivo* and *in vitro* studies of growth factors and other agents that stimulate cell division, mutagens, and mutagen testing. CANCERLIT is updated each month with 6,000 new references. Most records have abstracts; records entered since January 1980 are indexed with the *Medical Subject Headings* (MeSH®) controlled vocabulary of the National Library of Medicine.

CANCORP CANADIAN CORPORATIONS

File 491
Menu

Coverage: Current (and 5 years' historical data)

Updates: Weekly

Data Type: Bibliographic

Provider: Micromedia, Ltd., Toronto, Ontario, Canada

CANCORP CANADIAN CORPORATIONS provides directory, financial, and textual information on over 6,600 public and private Canadian corporations. Directory information includes name, address, telephone number, CUSIP numbers, Canadian and American exchanges, U.S. Standard Industrial Classification (SIC) codes, holding company information, auditors, officers, and rankings from the Report on Business 1000, the Financial Post 500, and

the Canadian Business 500. Financial information includes key accounts from the annual balance sheet and income statement, annual financial ratios, and summary data from interim financial statements. Textual information includes Description of Business, Mergers & Acquisitions activities, President's Letter to Shareholders, and Ownership information from the annual *Information Circular*.

Menu

Coverage: Current

Updates: Daily

Data Type: Complete-text

Provider: U.S. Bureau of the Census, Washington, DC

CENDATA™ contains selected statistical data from censuses and surveys, press releases, and product information from the Bureau of the Census, U.S. Department of Commerce. Subjects covered include agriculture, business, industry, construction and housing, trade, government and international affairs, manufacturing, population, industry data, and more. Demographic data includes selected

tables from the 1990 census Summary Tape File 1 (STF 1), containing data from the short form (age, sex, and household information are a few topics), and STF 3, containing data from the long form (including income, occupation, labor force status, journey to work, educational attainment, ancestry, language spoken at home, and housing characteristics), excerpts from Current Population Reports, excerpts from the 1980 census, and limited data on more than 200 countries. CENDATA is accessible in two formats: a standard DIALOG file (File 580) in which searching is by command, and an easy-to-use menu file (CENDATA). Both CENDATA files contain identical information, but logon procedures and search techniques differ.

CERAMIC ABSTRACTS

File 335 Menu

Coverage: 1976 to the present

Updates: Bimonthly

Data Type: Bibliographic

Provider: The American Ceramic Society, Inc.,
Westerville, OH

The CERAMIC ABSTRACTS database corresponds to the print publication of the same name produced by The American Ceramic Society, Inc., and provides coverage of the world's technical literature on all aspects of ceramics from 1980 to the present. Most non-patent records contain abstracts in English regardless of the language of the origi-

nal article. CERAMIC ABSTRACTS covers scientific, commercial, and engineering literature pertaining to ceramics and related materials. Patents, as well as the processing and manufacturing aspects of ceramics, are included.

Articles or patents cited are categorized by the following section headings: Abrasives; Art, Design, and Archeology; Cements and Plasters; Ceramic-Metal Systems; Chemistry; Dielectrics and Semiconductors; Electronics Ceramics; Engineering Materials; Fiber Optics; Glass Chemistry; Glass Processing; Instruments and Test Methods; Kilns, Dryers, Furnaces and Fuels; Magnetic Materials; Nuclear Materials; Piezoelectrics and Ferroelectrics; Physics; Production Processes and Equipment; Raw Materials and Additives; Refractories; Structural Clay Products; and Whitewares.

CHAPMAN AND HALL CHEMICAL DATABASE (formerly HEILBRON)

File 303 Menu

Coverage: Current

Updates: Semiannually

Data Type: Directory

Provider: Chapman & Hall Ltd., London, England

CHAPMAN AND HALL CHEMICAL DATABASE (CHCD) represents the complete text of two major chemical dictionaries from Chapman & Hall Ltd.: *Dictionary of Organic Compounds* (Fifth edition) and *Dictionary of Organometallic Compounds*. Also included are other source books, including: *Carbohydrates*, *Amino Acids and Peptides*, *The Dictionary of Antibiotics and Related Compounds*, and *The Dictionary of Organophosphorus Compounds*. Other publications will be added to the file in the future. CHCD is a source database of chemical identification, physical-chemical properties, use, hazard, and key reference data on the world's more important chemical substances, as selected by a panel of experts. CHCD provides chemical substance identification through these searchable fields: physical and/or chemical properties, compound variants, derivative names, synonyms, CAS® Registry Numbers, molecular formulae and molecular weight, source statements, use/importance data, melting point, freezing point, boiling point, solubility, relative density, optical rotation, and dissociation constants. Chemical

images can be displayed with DIALOGLINK® software.

CHEM-INTELL **File 318**

Coverage: Current
Updates: Monthly
Data Type: Directory, Numeric
Provider: Chemical Intelligence Services, London, U.K.

CHEM-INTELL is produced by Chemical Intelligence Services, a division of Reed Telepublishing Ltd. The database provides information on manufacturing plants, as well as trade and production figures for over 100 organic and inorganic chemicals. Two subfiles identify the two types of records that may be retrieved in this database: 1) the Plant Reports subfile includes company name, location, capacity, process, feedstocks, licensor, and contractor; and 2) the Trade and Production Statistics subfile provides production quantities for the latest ten years, and export and import figures that include a detailed two-year trade breakdown. The two-year trade breakdown identifies the countries, quantities, and value of exported or imported chemicals. Each piece of information is searchable. Organic and inorganic chemicals, including petrochemicals, fertilizers, polymers, rubbers, and synthetic fibers, are covered. The Plant Reports subfile information is gathered from direct correspondence with producers, plant contractors and licensors, company reports, press releases, market and industry surveys, and a comprehensive range of publications. The Trade and Production Statistics subfile information is obtained from information supplied directly by customs authorities, international statistical office publications, trade associations, and selected periodicals and research reports.

CHEMICAL BUSINESS NEWSBASE **File 319** **Menu**

Coverage: October 1984 to the present
Updates: Weekly
Data Type: Bibliographic
Provider: The Royal Society of Chemistry, Cambridge, U.K.

CHEMICAL BUSINESS NEWSBASE (CBNB) is a major business database containing facts about the chemical and allied industries, with a particular emphasis on European news. Records contained in the database summarize items from journals, press releases, company reports, advertisements, publishers' lists (government departments), and other sources that are appropriate to covering chemical business news. An abstract is present in each record. Bibliographic source information, as well as factual data regarding production figures, sales, etc., is available in CBNB. CBNB provides information affecting chemical markets or products, and covers a variety of topics, including legislation, environmental aspects, merger information, markets, sales, new products, production, trading, and company results. Coverage extends into all major end-use sectors for chemicals, including pharmaceuticals, dyes, paper products, cosmetics, and agrochemicals.

CHEMICAL SAFETY NEWSBASE **File 317**

Coverage: January 1981 to the present
Updates: Monthly
Data Type: Bibliographic
Provider: The Royal Society of Chemistry, Cambridge, U.K.

CHEMICAL SAFETY NEWSBASE (CSNB) is produced by the Royal Society of Chemistry (RSC). CSNB provides information on the hazardous and potentially hazardous effects of chemicals and processes encountered by workers in industry and laboratories. It also covers microbiological and radiation hazards encountered in the workplace. It is of interest to workers, safety officers, and all those concerned with health and safety management. The database includes information on: animals, microorganisms, and radiation; biological effects of chemicals; chemical reactions; emergency planning; fires and explosions; laboratory design, management, and practice; legislation and standards; occupational health and hygiene; safe practices and equipment; transportation and storage of chemicals; and waste management. Items on well-known hazards are not included unless new information is given. CHEMICAL SAFETY NEWSBASE corresponds to the print publications *Chemical Hazards in Industry* and *Laboratory Hazards Bulletin*.

CHEMNAME®

File 301 Menu

Coverage: 1967 to the present

Updates: Monthly

Data Type: Directory

Provider: Chemical Abstracts Service, Columbus, OH

CHEMNAME® (CA Chemical Name Dictionary) is a subset of CHEMSEARCH™, File 398. It contains all chemical substances registered by Chemical Abstracts Service (CAS) that have been cited in CA SEARCH®, File 399, more than one time since 1967. Each record in CHEMNAME contains identifying information about the chemical substance such as CAS® Registry Number, molecular formula, CA Substance Index NameSM, synonyms, complete ring data, Collective Index, component information, and other chemical substance data. Name searching and substructure searching via nomenclature are available. The primary purpose of this file is to support specific chemical substance searching for more frequently cited chemical substances. The content of records in CHEMNAME is identical to that of records in CHEMSEARCH. More comprehensive retrieval of all substances registered by CAS® since 1957 is available in CHEMSEARCH, File 398.

*CHEMTOX ONLINE

File 337

Coverage: Current

Updates: Quarterly

Data Type: Directory

Provider: Resource Consultants, Inc., Brentwood, TN

CHEMTOX ONLINE, a file of regulated toxic and hazardous substances, is a comprehensive collection of data on over 6,400 chemicals having physical and chemical properties that make them dangerous to individuals and/or the environment. Data coverage includes a chemical's physical, chemical, and toxicological properties; health, safety, and risk management aspects; first aid procedures; and regulatory status under various United States EPA (RCRA, EPCRA, CAA, CWA, etc.), DOT (HM181), and OSHA regulations. In addition, a chemical's regulatory status on numerous state lists is included. Of special interest is the total integration of toxicity data, including carcinogenicity status as reported by IARP, NTP, OSHA, ACGIH, and other agencies.

CLAIMS™/CITATION **Files 220, 221, 222**

Coverage: 1947 to the present (see below)
Updates: Quarterly
Data Type: Bibliographic
Provider: Search Check, Inc., Arlington, VA and
IFI/Plenum Data Corp., Alexandria, VA

CLAIMS™/CITATION is designed to link later patents to

the earlier patents they cite. The CLAIMS/CITATION files reference over five million patent numbers cited in U.S. patents since 1947. Each record includes a U.S. patent number, plus patent numbers (both U.S. and non-U.S.) cited to that patent by other U.S. patents. Each quarterly addition to the file also updates the content of the records to include all subsequently produced patents that cite earlier patents. CLAIMS/CITATION files can be used as companion files to the other IFI/Plenum CLAIMS patent files (23, 24, 25, 125, 340, 223, 224, 225, 341), since CLAIMS patent file records include citation counts giving the number of patents cited. After using the CLAIMS patent file, the CLAIMS/CITATION file may be used to retrieve the full list of citing patent numbers.

CLAIMS™/REASSIGNMENT & REEXAMINATION File 123

Coverage: Reassigned patents from 1980;
reexamined patents from 1981;
expired patents from September 1985;
extended patents from April 1986

Updates: Bimonthly

Data Type: Bibliographic

Provider: IFI/Plenum Data Corporation, Alexandria, VA

The CLAIMS/REASSIGNMENT & REEXAMINATION file provides information on the current status of U.S. patents, including reassignment, reexamination, extensions, and expirations. The reassignment of a patent occurs when the ownership of a patent is transferred from the original assignee to another company or individual. Reexamined patents are those patents that have undergone a review by the U.S. Patent and Trademark Office due to substantial new questions regarding the patentability of the patent's claims. Extensions occur primarily with pharmaceutical patents for which the time needed for federal approval of a product has shortened the normal patent protection time period. The expiration of a patent occurs when the normal maintenance fees are not paid to the U.S. Patent and Trademark Office.

CLAIMS™/REFERENCE File 124

Coverage: Current

Updates: Quarterly reload

Data Type: Directory

Provider: IFI/Plenum Data Corporation, Alexandria, VA

The CLAIMS™/REFERENCE file is a dictionary index to the subject classification used in the CLAIMS family of patent databases. Designed to significantly enhance retrieval from the CLAIMS files, the file contains two distinct systems of indexing. First, it contains the U.S. patent classification codes that are assigned by the U.S. Patent and Trademark Office to U.S. patents. The classification system is represented online by the U.S. Patent Office *Manual of Classification* and the *Index to the U.S. Patent Classification*, and may be used as an aid to searching the CLAIMS™/U.S. PATENT ABSTRACTS files. Second, it contains vocabulary and thesaurus terms, that are assigned

by IFI/Plenum, and may be used in the CLAIMS™/UNITERM files (Files 223-225, 341).

Coverage: 1950 to the present (see below)

Updates: Monthly (File 25)

Data Type: Bibliographic

Provider: IFI/Plenum Data Corporation, Alexandria, VA

The CLAIMS™/U.S. PATENT ABSTRACTS files contain patents listed in the general, chemical, electrical, and mechanical sections of the *Official Gazette* of the U.S. Patent Office and also U.S. design patents. All patent records include front-page information including abstracts, and all claims from 1971 to the present. Design patents do not have claims and are covered from 1980 to the present. Chemical patent information is available from 1950 to the present. Chemical patent records through 1979 list equivalent patents from Belgium, France, Great Britain, West Germany, and the Netherlands. Chemical patent records contain the most comprehensive claim from 1950 to 1970. CAS® Registry Numbers are included for most chemical patents. Electrical and mechanical patent records contain bibliographic information from 1963 to 1970, and the most comprehensive claim from 1965 to 1970.

CLAIMS™/UNITERM Files 223, 224, 225, 341 Menu

Coverage: 1950 to the present (see below)

Updates: Quarterly (File 225)

Data Type: Bibliographic

Provider: IFI/Plenum Data Corporation, Alexandria, VA

The CLAIMS™/UNITERM files give access to chemical and chemically related patents. They have the special feature of subject indexing for each chemical patent from a controlled vocabulary designed to facilitate retrieval of chemical structures and polymers. Indexing is prepared from a review of the full text of patent documents; 40 or more UNITERM codes are then added to each record. File 223: 1950-1970 (parallels File 23). File 224: 1971-1981 (parallels File 24). File 225: 1982+ (parallels File 25). File 341: 1950 to the present (parallels File 340).

Subscribers to the *Uniterm Index* (book format) have unlimited use of CLAIMS/UNITERM files. Non-subscribers are limited to a maximum of 12 hours of use per calendar year.

COMMERCE BUSINESS DAILY Files 194, 195
Menu
CDROM

Coverage: October 1982 to the present
Updates: Daily (File 195); Monthly (File 194)
Data Type: Complete-text, Directory
Provider: Commerce Business Daily, U.S. Department of Commerce, Chicago, IL

COMMERCE BUSINESS DAILY is the complete-text equivalent of the print *Commerce Business Daily*, which is issued every weekday to announce products and services wanted or offered by the U.S. government. File 195 is updated daily; all announcements are searchable on the day before they appear in the print publication. The following federal procurement information is included in the file: all proposed procurements of \$25,000 or more by civil agencies and military agencies, including potential research interests; all contract awards of \$25,000 or more for the benefit of potential sub-contractors; non-U.S. government procurements; surplus U.S. government property sales; non-U.S. government standards that may affect U.S. exports; special notices; and occasional announcements of business-related events, such as procurement conferences and symposia. Daily updates remain in File 195 for a period of 60 to 90 days, and then the oldest month of material is transferred to the backfile (File 194).

COMPANY INTELLIGENCE™ File 479
Menu

Coverage: Current
Updates: Daily
Data Type: Bibliographic
Provider: Information Access Company, Foster City, CA

COMPANY INTELLIGENCE™, a combined directory and company news file published by Information Access Company, contains current address, financial, and marketing information on approximately 100,000 U.S. private and public companies. Approximately 90,000 of these companies are listed in the three-volume set of the 1989 *Ward's Business Directory*™. These companies may be either headquarters or single-location establishments; they also may be American or non-U.S. parent companies with U.S.-based divisions or subsidiaries. The database also contains up to 10 of the most recent news references on each company found in periodicals indexed by IAC. Notations are also given as to the availability of additional citations and complete text. Companies covered by *Ward's Business Directory* have a gross annual sales volume of over \$500,000. Companies derived from news stories found in over 3,000 newspapers, magazines, and journals are not subject to minimum revenue criteria.

CONFERENCE PAPERS INDEX

File 77
Menu

Coverage: 1973 to the present
Updates: 6 times per year
Data Type: Bibliographic
Provider: Cambridge Scientific Abstracts, Bethesda, MD

CONFERENCE PAPERS INDEX provides access to records of the more than 100,000 scientific and technical papers presented at over 1,000 major regional, national, and international meetings each year. CONFERENCE PAPERS INDEX provides a centralized source of information on reports of current research and development from papers presented at conferences and meetings. It provides titles of the papers, as well as the names and addresses (when available) of the authors of these papers. Also included in this database are announcements of any publications issued from the meetings, in addition to available preprints, reprints, abstract booklets, and proceedings volumes, including dates of availability, costs, and ordering information. Primary subject areas covered include the life sciences, chemistry, physical sciences, geosciences, and engineering.

CONSUMER DRUG INFORMATION FULLTEXT File 271 Menu

Coverage: Current edition
Updates: Quarterly (with annual reloads)
Data Type: Complete-text, Directory
Provider: American Society of Hospital Pharmacists,
Washington, DC

CONSUMER DRUG INFORMATION FULLTEXT (CDIF) represents the complete text of the *Consumer Drug Digest*, published by the American Society of Hospital Pharmacists. CDIF contains in-depth descriptions of more than 260 drug entities, which make up over 80% of all prescription drugs, and a number of important non-prescription drugs. CDIF offers descriptions of drugs; how they work; possible side effects and how to manage them; precautions; instructions on dosage and use, including the foods and activities that are permitted during medication and what to do if a dose is missed; and advice on storing drugs. This popular version of drug information offers all the information consumers need to work with their physicians to ensure effective drug therapy.

CURRENT DIGEST OF THE SOVIET PRESS

File 645
Menu

Coverage: January 1982 to the present

Updates: Weekly

Data Type: Complete-text

Provider: Current Digest of the Soviet Press, Columbus, OH

The CURRENT DIGEST OF THE SOVIET PRESS database is the online equivalent to the weekly English-language journal of the same name, which contains translations and abstracts from Soviet newspapers and magazines. The newspapers include *Pravda* and *Izvestia*, as well as the republic papers and central papers in specialized areas. Meticulously translated by specialists and presented without elaboration or comment, the articles accurately convey the information and viewpoints of the Soviet press. The *Digest* translates all major documents, policy statements, and speeches, and covers the full range of newsworthy views and events. It abstracts articles from a wide variety of periodicals, many of them unavailable in most university or public libraries, and provides expert, dependable translations that have won worldwide respect. CURRENT DIGEST OF THE SOVIET PRESS covers the general press and all areas except the hard sciences.

D&B - MILLION DOLLAR DIRECTORY® (MDD) provides comprehensive business information on 161,000 U.S. companies. Listings are limited to companies with \$25 million or more in sales, or 250+ employees, or a net worth of \$500,000 or more, and include hard-to-find information on businesses that are privately held, as well as publicly owned companies. MDD records contain company name, full address, including county and SMSA, primary and secondary SIC codes, annual sales, and number of employees. The MDD file records also include the names of individuals holding positions in as many as 25 executive function areas. File 517 is not available for use by customers in South Africa.

DELPHEES EUROPEAN BUSINESS **File 481** **Menu**

Coverage: 1980 to the present
Updates: Weekly
Data Type: Bibliographic
Provider: Chamber of Commerce and Industry of Paris and
The French Assembly of the Chambers of Commerce
and Industry, Paris, France

DELPHEES EUROPEAN BUSINESS is a leading French database that provides information on international markets, products, industries, and companies from the European perspective. Abstracts are produced by approximately 60 local organizations grouped into two networks, CCIP (Chamber of Commerce and Industry Paris) and ACFCI (French Assembly of the Chambers of Commerce and Industry) which collect and consolidate the information into the DELPHES database. DELPHES contains bibliographic citations and informative abstracts from over 900 European trade journals, newspapers, and business periodicals, in French, English, Italian, German, or Spanish. Titles are in the original language; abstracts are in French. A comprehensive classification scheme in English and French is used to index documents covered. Geographic coverage is 45% France,

35% Europe, and 20% is devoted to other countries. In addition, about 1,000 new books, corporate and business directories, and reports are reviewed each year.

DERWENT BIOTECHNOLOGY **File 357** **ABSTRACTS** **Menu**

Coverage: 1982 to the present
Updates: Monthly
Data Type: Bibliographic
Provider: Derwent, Inc., London, U.K.

DERWENT BIOTECHNOLOGY ABSTRACTS provides comprehensive coverage of publications describing research in the field of biotechnology. It covers all aspects of biotechnology, including genetic engineering, biochemical engineering, fermentation, cell culture, and waste disposal, as reported in scientific journals and in the patents literature. Each month data from 1,000 to 1,200 documents is added to the file. Each record in the database comprises a detailed abstract of up to 200 words together with controlled-language indexing. Literature records include complete bibliographic information, and patent documents include patent number, patentee, and publication details. Approximately 27% of the records are patent records. The database corresponds to the print publication of the same name. DERWENT BIOTECHNOLOGY ABSTRACTS provides detailed coverage of all aspects of biotechnology from agricultural use to pharmaceuticals, including genetics, downstream processing, and more.

DERWENT RINGDOC **Files 911, 912, 913** **Menu**

Coverage: 1964 to the present
Updates: Monthly

Data Type: Bibliographic

Provider: Derwent Publications, Ltd., London, U.K.

DERWENT RINGDOC is a collection of three databases produced by Derwent Publications, Ltd. These databases provide access to information important to the pharmaceutical industry. Coverage includes information on the chemistry, biochemistry, pharmacology, therapeutic effects, and toxicology of drugs. This includes the preparation and testing of potential drugs, analysis, pharmacokinetics, and isolation from natural sources. Two of the three databases are drawn from over 800 key worldwide journals.

The historical database provides information from 1964 through 1982 containing over 800,000 records. The current database, from 1983 to the present, is updated on a monthly basis, adding approximately 4,000 records per month. The third database is an authoritative file providing detailed information on a drug, its biological activity and chemical substructure, keywords, and codes. To access the DERWENT RINGDOC files, contact Derwent offices either in the U.S. or in the U.K.

DERWENT WORLD PATENTS INDEX **Files 350, 351** **Menu**

Coverage: 1963 to the present

Updates: Weekly (File 351); Monthly (File 350)

Data Type: Bibliographic

Provider: Derwent Publications, Ltd., London, U.K.

DERWENT WORLD PATENTS INDEX (WPI, File 350) and DERWENT WORLD PATENTS INDEX LATEST (WPIL, File 351) files contain data from nearly 3 million inventions represented in more than 6 million patent documents from 30 patent issuing authorities around the world. In addition to bibliographic information, the basic patent record includes the full abstract (for new patents issued from 1981 to the present), informative title, International Patent Classification codes, and Derwent subject codes. These files also provide access to equivalent patents, grouped together by patent family in the basic patent record. The use of manual and fragmentation codes is restricted to Derwent subscribers, in accordance with their subscription level.

Pharmaceutical patents are included from 1963 to the present; agricultural chemical patents from 1965 to the present; and polymer and plastics patents from 1966 to the present. Coverage of all chemical patents began in 1970; coverage of all patents irrespective of subject began in 1974. DERWENT WORLD PATENTS INDEX LATEST, File 351, covers basic patents from 1981 to the present. DERWENT WORLD PATENTS INDEX, File 350, covers basics through 1980.

Derwent subscribers receive a reduced rate when searching Files 350 and 351 on DIALOG.

DIALINDEX® **File 411**

Coverage: Most DIALOG databases

Provider: Dialog Information Services, Inc., Palo Alto, CA

DIALINDEX® is a collection of the file indexes for most DIALOG databases (menu-driven files are not available). DIALINDEX provides the number of postings for each search statement in each of the specified databases. This database is most useful for determining which file(s) would be most productive for a search statement, and for helping to determine how broadly or narrowly to define a search strategy. Predefined subject categories may be used or individual databases may be specified by number.

DIALOG BLUESHEETS™

File 415 CDROM

Coverage: Same as for all DIALOG databases

Updates: Weekly reloads

Data Type: Complete-text

Provider: Dialog Information Services, Inc., Palo Alto, CA

The DIALOG BLUESHEETS™ database contains records representing the Bluesheet documentation issued for all databases on the DIALOG Information Retrieval Service. All databases are represented, including bibliographic files, complete-text files, menu-driven files, and gateway services. Each record represents a Bluesheet and contains traditional first-page information, including a file description, subject coverage, sources, file data, origin, and legal terms and conditions. All searchable indexes, display codes, field names, examples, sorts, limits, report fields, map fields, predefined formats, and direct record access information are included.

Source information for the DIALOG BLUESHEETS database is derived from print Bluesheet documentation. Additional information not found on the printed Bluesheets is also included, such as availability of DIALOG AlertSM service, Classroom Instruction Program databases, type of data in the file, document types indexed in the database represented, DIALINDEX® category acronyms, and annual accession number ranges for files having accession number limits.

DIALOG COMPANY NAME FINDER™ File 416

Coverage: DIALOG databases indexing company name

Updates: Quarterly reloads

Data Type: Directory

Provider: Dialog Information Services, Inc., Palo Alto, CA

DIALOG COMPANY NAME FINDER™ is a search aid database designed to locate company information in DIALOG databases. Company name records are created for unique entries in the company name indexes of the DIALOG files included. Company names are shown in the form in which they appear in the original database index, including abbreviations, punctuation (commas and periods are stripped out), and spelling variations, and are limited to 46 characters, the maximum length of an index entry. Long company names may be truncated because of the 46-character maximum.

Use of File 416 allows quick identification of files that have information pertaining to a particular company. When the exact name is unknown, the CO= index may be EXPANDED to browse company name variations. Key words in the name may be searched in the Basic Index.

DIALOG JOURNAL NAME FINDER™

File 414

Coverage: Same as for databases represented

Updates: Reloaded monthly

Data Type: Directory

Provider: Dialog Information Services, Inc., Palo Alto, CA

The DIALOG JOURNAL NAME FINDER™, File 414, is a master index to journal names contained in DIALOG databases. Individual records have been created for all unique entries in the JN= and JO= indexes. Journal names are included in the form in which they appear in the original database index, including abbreviations, punctuation, and spelling variations, and are truncated to 46 characters, the maximum length of an index entry. Some journal titles are incomplete because of the truncation. The use of truncation is recommended to retrieve all possible variations of journal titles and to eliminate the 46-character maximum field length.

Use of File 414 allows quick identification of files having the most comprehensive coverage of a journal. When the exact name is unknown, any key word in the title may be selected. To assure complete retrieval, truncate search terms to allow for abbreviated words.

DIALOG QUOTES AND TRADING™

File QUOTES

Coverage: Current
Updates: Daily (20 minute delay)
Provider: Trade*Plus, Palo Alto, CA

DIALOG QUOTES AND TRADING™ delivers stock and options quotes, delayed at least 20 minutes, from the New York and American Stock Exchanges, NASDAQ, and the four major options exchanges. In addition to quotes, order entry allows the purchase or sale of any stock or option listed in *The Wall Street Journal*. Up to 75 portfolios can be set up on DIALOG QUOTES AND TRADING, with the value of the portfolio's securities updated to reflect current market prices. QUOTES also provides the means to track gains and losses and to project the dividend income of a portfolio. Tax records maintained on the service can include securities, stocks, options, mutual funds, and bonds, and reflect all stocks and options sold. This file offers quantitative tools to evaluate stock option transactions.

DIALOG acts as a gateway service to Trade*Plus. Searchers are automatically transferred to the Trade*Plus system after logging on to the file through DIALOG. This service operates with prompted menus.

ECONOMIC LITERATURE INDEX File 139 Menu

Coverage: 1969 to the present

Updates: Quarterly

Data Type: Bibliographic

Provider: The American Economic Association,
Pittsburgh, PA

ECONOMIC LITERATURE INDEX is an index of journal articles and book reviews from 260 economics journals and from approximately 200 monographs per year. Since June 1984, abstracts from selected journals have been added to approximately 25% of the records in the file. The descriptive abstracts are approximately 100 words in length and are written by the author or editor of the journal article; all are in English. The database corresponds to the index section of the quarterly *Journal of Economic Literature* and to the annual *Index of Economic Articles*.

In 1991, over 8,000 references to books and dissertations that were indexed in the March 1987 through current issues of JEL were added to the file.

EIU: BUSINESS INTERNATIONAL File 627 Menu

Coverage: January 1989 to the present

Updates: Weekly

Data Type: Complete-text

Provider: The Economist Intelligence Unit (EIU),
New York, NY

EIU: BUSINESS INTERNATIONAL provides business information on 57 countries in a variety of formats, including weekly newsletters, monthly currency reports and regulatory monitors, and quarterly country profiles. Principal focus is on political and economic trends, market analyses, and corporate strategies, including detailed case examples of successful firms and their use of innovative financial tools and techniques. Information on critical international business issues is found among the topics covered in BI publications. Functional topics include Euromarkets, exposure management, cash management, acquisitions and alliances, aid finance, and assessing foreign subsidiary performance. Country-specific coverage includes political and economic conditions, foreign exchange regulations, monetary conditions, currency behavior and forecasts, political and economic risk, trade regulations, sources of capital, macroeconomic performance and forecasts, and equity markets. All items in EIU: BUSINESS INTERNATIONAL are the complete text from selected Business International publications. These publications are country reports, regional overviews, business guides, and investment profiles.

ENGINEERED MATERIALS ABSTRACTS®

File 293 **Menu** **CDROM**

Coverage: January 1986 to the present
Updates: Monthly
Data Type: Bibliographic
Provider: Materials Information, a joint service of ASM

International, Materials Park, OH; and Institute of Materials, London, U.K.

ENGINEERED MATERIALS ABSTRACTS® (EMA) is produced by Materials Information, a joint service of ASM International (U.S.) and The Institute of Materials (U.K.). The database corresponds to the print publication of the same name, which began publication in January 1986. Informative abstracts are included for most records.

EMA provides comprehensive coverage of the world's published literature concerning: 1) the science of polymers, ceramics, and composite materials intended for use in the design, construction, and operation of structures, equipment, and systems; and 2) the practices of materials science and engineering as they relate to these materials. Composite materials represented in the coverage are primarily non-metallic, with ceramic or polymeric matrices. Laminated and composite structures, such as honeycombs, essentially consist of non-metallic materials, although metal flakes, fibers, or other forms may occur as reinforcement. Subjects covered include materials, properties, processes, products, and forms of these engineered materials.

EVENTLINE™

File 165
Menu

Coverage: October 1989 through 2000+

Updates: Monthly

Data Type: Directory

Provider: Elsevier Science Publishers, Amsterdam,
The Netherlands

EVENTLINE™ is a multidisciplinary, multinational database containing information on past and forthcoming events. The database provides data relating to conventions, symposia, exhibitions, trade fairs, and major sporting events. EVENTLINE can be used to find dates and locations of vital meetings, plan a marketing strategy, assist in travel planning, compile statistics on trends in meetings, and much more. Information on past events is retained in EVENTLINE for retrospective searching.

The scope of EVENTLINE is broad. It covers all the sciences, industry and business, and major sporting events. The information in the database comes primarily from original announcements and data researched by Elsevier. In 1991, the Success Meetings database of 18,000 events in North America, owned by Bill Communications Group in New York, was added to the file.

EXCERPTA MEDICA (see EMBASE)

EXPERTNET®

**File 183
Menu**

Coverage: Current
Updates: 5 - 6 times per year
Data Type: Directory
Provider: ExpertNet, Ltd., Chicago, IL

EXPERTNET® contains biographical profiles for over a thousand medical experts, each of whom has signed an agreement with ExpertNet Ltd. indicating a willingness to participate in medicolegal consultation. Virtually all of these experts are physicians, the vast majority of whom are in active practice or teaching positions. All geographic areas are represented, as well as virtually all medical specialties. Although many of these experts have medicolegal experience, "professional witnesses" are discouraged from participation in EXPERTNET.

Each profile contains information about the expert's medical specialties, education and clinical training, board certification, past experience and current positions. Limitations on geographic availability, willingness to testify, typical

hourly fees, and miscellaneous comments are given. The expert's name, address, and telephone number(s), in addition to an approximate age, are available in Format 9 only.

FEDERAL NEWS SERVICE

File 660

Coverage: January 1, 1991 to the present
Updates: Daily
Data Type: Complete-text
Provider: Federal Information Systems Corp., Washington, DC

FEDERAL NEWS SERVICE contains verbatim transcripts of press briefings, speeches, backgrounders, and conferences, as well as interviews on official U.S. policy on a broad range of national and international issues. In many

cases, FEDERAL NEWS SERVICE is the sole source for information discussed at U.S. government briefings that are not covered by the media. Transcripts contain the actual words spoken, and are neither condensed nor abstracted. The file also contains a Daybook of all government events occurring in Washington, DC, for the month, day, or week ahead, as well as other events of interest, such as lectures.

Subject coverage includes, but is not limited to, the following: Congressional Committee hearings and witness testimony; speeches and statements made by the President in the U.S. and abroad; a daybook itemizing every government event, both public and private, that occurs in Washington, DC, for the month, week, and day ahead; Daily White House, State Department, and Defense Department briefings; U.S. Trade Representative press briefings and statements; statements and testimony of senior officials of the Office of Management and Budget; and the Treasury, State, and Defense Departments; National Press Club luncheons, including the question and answer periods; statements made by foreign dignitaries while in the U.S.; transcripts of TV news programs from ABC, CBS, NBC, and others; English transcripts from the Kremlin of official policy statements by Russian officials; and selected coverage of UN events.

Provider: U.S. Government Printing Office, Washington, DC

FEDERAL REGISTER provides the full text of the *Federal Register*, a daily publication of the United States government that serves as the medium for notifying the public of official agency actions. The file is of special interest to those who need to stay abreast of regulatory developments. Published every federal working day, the *Federal Register* provides a uniform system for making available to the public regulations and legal notices issued by federal agencies and the President. The documents are grouped and published in the following categories: Presidential documents,

rules and regulations, proposed rules, notices, and Sunshine Act meetings.

FINE CHEMICALS DATABASE

File 360

Coverage: Current
Updates: Semiannual reloads

Data Type: Directory
Provider: Chemron, Inc., San Antonio, TX

FINE CHEMICALS DATABASE, produced by Chemron Incorporated, contains current product information for chemical manufacturing and distribution companies in North America and Europe. The database focuses on sources for laboratory, specialty, and unusual chemicals and reagents used in scientific research and new product development.

FINE CHEMICALS DATABASE provides information on approximately 207,000 chemical products available from over 50 chemical manufacturers and distributors. Each record contains catalog number, product name, company name, address, telephone, and Fax/TWX/Telex numbers. Chemical synonyms and trade names are available for many products. Many records also include Chemical Abstracts Service (CAS®) Registry Number and molecular formula.

FOUNDATION DIRECTORY **File 26** **Menu**

Coverage: Current year's data
Updates: Annual reload
Data Type: Directory
Provider: The Foundation Center, New York, NY

The FOUNDATION DIRECTORY is a comprehensive directory providing descriptions of more than 32,500 active grant makers, including grant-making foundations, community foundations, operating foundations, and corporate grant makers. Principal sources of information are voluntary reports by many grant makers directly to the Foundation Center and information obtained from public information returns filed each year with the Internal Revenue Service by private foundations. More than 400 non-foundation corporate giving programs have been added for the first time beginning with records input in the spring of 1991.

FOUNDATION GRANTS INDEX **File 27** **Menu**

Coverage: 1973 to the present
Updates: Quarterly
Data Type: Directory
Provider: The Foundation Center, New York, NY

FOUNDATION GRANTS INDEX contains records describing grants that have been awarded to nonprofit organizations by the larger private, philanthropic foundations (more than 800 in 1991) located in the United States, representing all records from the Foundation Grants Index section of the bimonthly *Foundation News*. The file is useful in determining types and amounts of grants awarded, since foundations seldom announce the availability of funds for specific purposes. Approximately 20,000 new grants are

added to the file each year. Grants are given primarily in the fields of education, health, welfare, sciences, international activities, humanities, and religion, with education as the most favored field for foundation giving. Grants to individuals and those less than \$5,000 are not included.

HEALTH DEVICES ALERTS[®]

File 198
Menu
CDROM

Coverage: 1977 to the present

Updates: Weekly

Data Type: Directory

Provider: ECRI, Plymouth Meeting, PA

HEALTH DEVICES ALERTS[®] (HDA), produced by ECRI, is a comprehensive database of reported medical device problems, hazards, recalls, evaluations, and updates. The selections are derived from an extensive review of the medical, legal, and technical literature, various national reporting networks and government sources, and ECRI's own international problem reporting network. Each entry is indexed using ECRI's internationally endorsed Universal Medical Device Nomenclature System (UMDNS). An online thesaurus is

available as an aid in locating broader, narrower, and related product names. A complete directory of medical devices and manufacturers is available in a companion database, File 188, ECRI's HEALTH DEVICES SOURCEBOOK[®].

HDA covers reports of problems with diagnostic and therapeutic medical equipment and related materials, ranging from sutures to magnetic resonance imaging units, including implanted devices and related accessories, disposable medical products, clinical laboratory reagents, and selected hospital furniture, casework, and systems.

HEALTH DEVICES SOURCEBOOK[®]

File 188
Menu

Coverage: Current

Updates: Annual reload

Data Type: Directory

Provider: ECRI, Plymouth Meeting, PA

The HEALTH DEVICES SOURCEBOOK[®], a directory file produced by ECRI, contains current address and marketing information on the North American manufacturers and distributors of more than 4,000 classes of medical devices. The database utilizes ECRI's internationally endorsed Universal Medical Device Nomenclature System (UMDNS). An online thesaurus is available as an aid in locating broader, narrower, and related product names. The file contains three types of records: product records (49% of the file), manufacturer records (44%), and service records (6%). Approximately 98% of the records pertain to United States manufacturers, products, and services, although ECRI plans to add more international coverage in the future.

The SOURCEBOOK covers all diagnostic and therapeutic medical devices and materials, as well as clinical laboratory equipment and reagents, selected hospital furniture, casework, and systems and instruments used to test clinical equipment. The SOURCEBOOK includes tens of thousands of trade names and more than 6,000 manufacturers, distributors, importers, and service companies.

ICC BRITISH COMPANY DIRECTORY **File 561 Menu**

Coverage: Current
Updates: Weekly
Data Type: Directory
Provider: ICC Online Ltd., London, U.K.

ICC BRITISH COMPANY DIRECTORY is a comprehensive reference source for companies registered in England, Wales, Scotland, and Northern Ireland. The file contains a record for each company included on the Index of Companies maintained by the official Companies Registration Offices in the U.K. Additionally, companies that have been dissolved (ceased to have any legal existence) since 1968 are listed. The total number of records in the ICC BRITISH COMPANY DIRECTORY is over two million; approximately 1.2 million are live companies. This figure is currently increasing at an annual rate of around 100,000. Given the breadth of coverage of this file, it is an ideal starting point in any search for a British company. A cross-reference to ICC BRITISH COMPANY FINANCIAL DATASHEETS (File 562) is provided in records when more detailed coverage is available in that file.

The records in the ICC BRITISH COMPANY DIRECTORY provide key reference data on British companies, including name, registered number, registered address, issued and nominal share capital, dates of incorporation and document filings at the Companies Registration Office. Document filings referenced as relevant include latest filed annual accounts and annual returns, changes of directors or registered address, special resolutions, mergers of public (PLC) companies, winding-up orders, appointment of liquidators, and notification of mortgages.

*IMSWORLD R & D FOCUS **File 445**

Coverage: Current
Updates: Monthly for *R&D Focus*; Weekly for *R&D Drug News*
Provider: IMSWorld Publications, Ltd., London, U.K.

IMSWORLD R & D FOCUS provides essential and timely information on worldwide pharmaceutical development. All aspects of drug development are covered, from product discovery to launch. This is an R&D monitoring database which is useful for competitive intelligence and tracking of pharmaceutical products in 48 countries. It was known as *Drug License Opportunities* until January 1992 when it was renamed *R & D Focus*. Sources of data include original news reporting, patent applications, coverage of the scientific literature, direct interviews with company officials, monitoring of licensing activity, and drug launch investigation.

R&D FOCUS includes two types of records: 1) R&D Focus records that include for each drug the generic name, laboratory code, CAS® Registry Number, chemical name, synonyms, therapeutic indications, patents issued, historical background, latest stage of worldwide development, commercial potential, and com-

pany activity; and 2) R&D Drug News records that provide a "quick alert" news service covering international research and pharmaceutical development. There are news reports on companies, drugs, and health care institutions from around the world.

INDUSTRY TRENDS AND ANALYSIS File 192 (formerly ARTHUR D. LITTLE ONLINE)

Coverage: January 1977 to the present

Updates: Bimonthly

Data Type: Complete-text

Provider: Decision Resources, Inc./Arthur D. Little, Burlington, MA

INDUSTRY TRENDS AND ANALYSIS is derived from the publications of Arthur D. Little Decision Resources, plus the non-exclusive publications of Arthur D. Little, Inc., its divisions and subsidiaries. The database includes industry forecasts, technology assessments, product and market overviews, public opinion surveys, and management commentaries. Industries and technologies covered in the file are: the chemical industry, including specialty chemicals; the health care industry, pharmaceuticals, medical equipment and devices, diagnostic products, and health care delivery services; biotechnology; advanced materials; food processing; environmental issues; and the information processing and telecommunications industries, including office automation, computers, equipment manufacturers, and services.

Most records prior to 1989 contain the complete text of reports; from 1989 forward, records contain extensive summaries of the research report. In 1991, *Spectrum*, a series of reports prepared by management consultants for major corporate clients, was added to the file in abstracted form.

INPADOC/FAMILY AND LEGAL STATUS

File 345
Menu

Coverage: 1968 to the present

Updates: Weekly

Data Type: Bibliographic

Provider: European Patent Office (EPO), Vienna, Austria

The INPADOC/FAMILY AND LEGAL STATUS database, produced by the International Patent Documentation Center, Vienna, Austria, contains a listing of patents issued in 56 countries and patenting organizations. The International Patent Documentation Center was formed in 1972, with the support of the World Intellectual Property Organization, to provide a centralized bibliographic source for patent documents. INPADOC contains bibliographic data consisting of title, inventor, and assignee for most patents. In addition, this file brings together information on priority application numbers, countries and dates, and equivalent patents (i.e., patent families) for patents issued by the 56 countries and organizations. This file also contains the legal status information for some countries. The file has a corresponding COM (Computer Output Microform) microfiche publication, *INPADOC Patent Gazette*.

INPADOC lists patents in all areas of technology. The online file contains patent data received from the International Patent Documentation Center. Legal Status information is provided for Austria, Switzerland, Germany, Denmark, the European Patent Office (EPO), France, the

United Kingdom, the Netherlands, the United States, and the World Intellectual Property Organization (WIPO).

INSIDER TRADING MONITOR

File 549

Coverage: 1984 to the present

Updates: Daily

Data Type: Numeric

Provider: Invest/Net, Inc., Ft. Lauderdale, FL

The INSIDER TRADING MONITOR database contains the transaction details of all insider trading filings (ownership changes) received by the U.S. Securities and Exchange Commission (SEC) since January 1984. The ownership of securities by over 100,000 officers, directors, and major shareholders (10% or more) in over 8,500 U.S. public companies is covered in the file. The INSIDER TRADING MONITOR covers all securities transactions by officers, directors, and major shareholders filed with the SEC as required under the Securities Act of 1934, including: insider's name, insider's position, company name, company address, company telephone number, transaction date, SIC code, filing date, ticker symbol, security price per share, and CUSIP number. Invest/Net is the subcontractor to the SEC, providing the data to the SEC to produce *The Official Summary of Security Transactions and Holdings*.

INSPEC

Files 2, 3, 4
Menu

Coverage: 1969 to the present

Updates: Weekly

Data Type: Bibliographic

Provider: Institution of Electrical Engineers, London, England

INSPEC (The Database for Physics, Electronics and Computing) corresponds to the three Science Abstracts print publications: *Physics Abstracts*, *Electrical and Electronics Abstracts*, and *Computer and Control Abstracts*. The Science Abstracts family of abstract journals began publication in 1898. Approximately 16 percent of the database's source publications are in languages

other than English, but all articles are abstracted and indexed in English. Author-prepared abstracts are used when available.

The INSPEC database utilizes controlled vocabulary from the *INSPEC Thesaurus*. A single classification scheme is used for all records from 1969 to date. The special DIALOG online thesaurus feature is available to assist searchers in determining appropriate subject terms and codes. Beginning in January 1987, INSPEC records also include chemical substance indexing and numerical index terms.

Coverage of the files is as follows:

INTERNATIONAL PHARMACEUTICAL ABSTRACTS **File 74 Menu**

Coverage: 1970 to the present

Updates: Monthly

Data Type: Bibliographic

Provider: American Society of Hospital Pharmacists, Bethesda, MD

INTERNATIONAL PHARMACEUTICAL ABSTRACTS (IPA) provides information on all phases of the development and use of drugs and on professional pharmaceutical practice. The IPA database is growing at a rate of 17,000 citations per year, indexed and abstracted from more than 650 pharmaceutical, medical, and related journals. In early 1985 coverage was expanded to include state pharmacy journals that deal with state regulations, salaries, guidelines, human resources studies, laws, and related topics. The scope of the database ranges from the clinical, practical, and theoretical to the economic and scientific aspects of the field. A unique feature of abstracts reporting clinical studies is the inclusion of the study design, number of patients, dosage, dosage forms, and dosage schedule. IPA is essential to anyone interested in keeping abreast of today's health-related drug literature.

KNIGHT-RIDDER FINANCIAL NEWS™

(see KNIGHT-RIDDER/TRIBUNE BUSINESS NEWS)

KNIGHT-RIDDER/TRIBUNE BUSINESS NEWS

File 609 Menu

Coverage: January 5, 1989 to the present

Updates: Continuous

Data Type: Complete-text

Provider: Knight-Ridder/Tribune Business News, Washington, DC, and Knight-Ridder Financial Information, New York, NY

KNIGHT-RIDDER/TRIBUNE BUSINESS NEWS (formerly KNIGHT-RIDDER FINANCIAL NEWS) retains all the news previously contained in the financial news product. Added is the full text of business and related articles from Knight-Ridder Inc.'s 28 newspapers, including the *Miami Herald*, *Philadelphia Inquirer*, *Detroit Free Press*, and *Journal of Commerce*, and Tribune Company's 6 newspapers, including *Chicago Tribune* and *Orlando Sentinel*. Also included are articles from *The Boston Globe*, *Dallas Morning News*, *New York Daily News*, *Orange County Register*, and *Seattle Times*. Articles from *Agweek* and *Traffic World* are part of the enhanced file. The newspaper and magazine articles are available in the file on the day of publication.

The file continues to provide the complete text of news stories on worldwide financial and commodity markets and the events that move them. Financial coverage centers on credit markets, foreign exchange, mortgage-backed securities, and financial futures, as well as banking, economic news, and corporate earnings. Commodity coverage includes both cash and futures market analysis. Weather information is available from Global Weather Services, Knight-Ridder's own weather forecasting center. Reports on the projected impact of government policy on the financial and commodity markets are also included.

KOMPASS CANADA

File 594 Menu

Coverage: Current

Updates: Annual reload

Data Type: Directory

Provider: Micromedia, Toronto, Canada

KOMPASS CANADA provides business information, including name, address, telephone number, executive names, and industry and product listings, for approximately 30,000 Canadian companies. Industry and product listings are searchable and displayable in English, German, French, Spanish, and Italian. KOMPASS codes, an international standard product classification system based on the Universal Commodity System (UCS), allow for very precise product/service retrieval. These codes provide consistent access to trade information, including foreign trade status, such as importer/exporter, at the product level. Applications for the database include locating business opportunities for distributors, importers, and exporters. The precision of the product codes also makes KOMPASS CANADA an excellent sourcing tool for manufacturers.

The companies that are covered in KOMPASS CANADA supply nearly 50,000 classes of products. The database covers establishments in the business-to-business sector with an emphasis on manufacturing, industrial, and associated service sectors. Most records include names of key executives, directors, and managers, along with their positions.

KOMPASS EUROPE**File 590
Menu**

Coverage: Current

Updates: Each country updated annually on a rotating basis

Data Type: Directory

Provider: Affarsdata, Stockholm, Sweden

KOMPASS EUROPE, a directory file produced by a consortium of five European publishing groups, provides business information on over 300,000 European companies in Belgium, Denmark, France, Ireland, Italy, Luxembourg, the Netherlands, Norway, Spain, Sweden, Switzerland, Germany, and the United Kingdom. With an emphasis on manufacturing, industrial, and associated service sectors, the database covers establishments in the business-to-business sector.

Information on each company usually includes the following: company name, address, telephone number, telex, description of business, number of employees, senior executives (maximum of 4), foreign trade status, products and activities, and languages spoken. Product names are displayable and searchable in English, German, French, Spanish, and Italian, and approximately 2,000 classes of products are covered. Most records include names of key executives, with approximately 310,000 named directors and managers included along with their positions.

Coverage: Current

Updates: Quarterly reloads

Data Type: Directory

Provider: Reed Information Services Ltd., West Sussex, U.K.

KOMPASS UK covers thousands of United Kingdom companies that supply approximately 45,000 classes of products. The database covers establishments in the business-to-business sector with an emphasis on manufacturing, industrial, and associated service sectors. Companies trading solely on a U.K. regional basis are generally not included. In addition to company name, address, telephone number, and product information, most records include names of key executives, with approximately 250,000 named directors and managers included along with their positions. The information in KOMPASS UK includes all data included in the following directories: *U.K. Kompass Register*, *Kelly's Directories*,

Dial Industry, *British Exports*, *U.K. Trade Names*, and *Directory of Directors*. This data has been merged to provide a single entry for each company that includes all available information.

Financial information is obtained quarterly from the government register maintained at Companies House.

LABORLAW II

File 243 Menu

Coverage: 1980 to the present (varies depending on subfile)

Updates: Monthly

Data Type: Bibliographic

Provider: Bureau of National Affairs, Washington, DC

LABORLAW II, produced by The Bureau of National Affairs, Inc., indexes and abstracts U.S. federal, state, and administrative agency decisions pertaining to labor relations. These decisions are reported in full in seven of BNA's print labor information services: *Labor Relations Reference Manual*, *Labor Arbitration Reports*, *Fair Employment Practice Cases*, *Wage and Hour Cases*, *Occupational Safety and Health Cases*, *Mine Safety and Health Cases*, and *Individual Employment Rights Cases*. Each record contains all information related to one court case or administrative decision. Every record includes the following: case name, BNA case number, tribunal, date of decision, and BNA citation. It may also contain tribunal code, parallel citations, case history, docket number, decision maker (judge, arbitrator, or agency decision maker), BNA decision number, circuit for each federal circuit court, and state laws applied. Each point of law for the case is summarized by BNA's attorney/editors in an abstract, or "headnote." The companion file, File 244, covers earlier information from the same subfiles.

LC MARC - BOOKS

File 426

Coverage: 1968 to the present

Updates: Weekly

Data Type: Bibliographic

Provider: U.S. Library of Congress, Washington, DC

The LC MARC - BOOKS database contains complete bibliographic records for all books cataloged by the U.S. Library of Congress since 1968, beginning with books in English and adding coverage of books in other languages from 1970 through 1979. The LC MARC - BOOKS database provides online access to a comprehensive, worldwide collection of books that can be searched by author, title, subject, series, publication date, and other access points.

The LC MARC - BOOKS database also provides a powerful tool for library acquisitions and cataloging departments to use in bibliographic verification and cataloging.

File 61
Menu

Coverage: 1969 to the present

Updates: Monthly

Data Type: Bibliographic

Provider: Bowker-Saur, Ltd., London, U.K.

LISA provides comprehensive coverage of international materials in the field of library and information science. The database consists of

two subfiles: LISA records that cite published works and Current Research records that correspond to the print *Current Research in Library & Information Science*, which provides international coverage of in-progress or recently completed research projects. More than 550 journals from 60 countries are screened for inclusion in the file. Since 1980, reports, conference proceedings, theses, and monographs have been extensively abstracted. Subject coverage is wide-ranging and includes not only librarianship and library services, but also online information retrieval, videotex, electronic publishing, word processing, teleconferencing, information storage and retrieval, and abstracting and indexing services. Also covered are related areas, such as publishing and bookselling, bibliography, archives, non-book materials and associated equipment, education, cultural activities, and mass media.

MARKETFULL File MARKETFULL (Full-Text Market Research Reports) Menu

Coverage: January 1991 to the present

Updates: Reports are updated on a rotating basis

Data Type: Complete-text

Providers: BCC, Norwalk, CT; Datamonitor, London, U.K.; Euromonitor, London, U.K.; The Freedonia Group, Cleveland, OH

MARKETFULL is a collection of full-text market research reports available on DIALOG. The term MARKETFULL can be used the same way as a file number, i.e., BEGIN MARKETFULL. This collection has been created to assist users in searching a group of databases from different publishers that share the same basic search and display fields in order to standardize the searching procedure. The records are drawn from extensive research reports that average 200 to 300 pages, and each record represents a section of the report. All market research reports include the full text of syndicated research, as well as tables included in the original text, with the exception of graphs that cannot be reproduced online. The reports contain extensive coverage of the following general topics: products, industries, markets, market share, pricing, consumer attitudes, consumption, sources of supply, and much more.

The collection consists of:

*BCC MARKET RESEARCH, File 764, produced by Business Communications Company (BCC) of Norwalk, CT, produces market research reports focussing on the areas of plastics, medical, materials, packaging, ceramics, optics, food, electronics, chemicals, and waste treatment research. Reports provide comprehensive information on market segmentation, industry structure, production and consumption applications, market penetration, major company profiles, distribution networks, and pricing.

DATAMONITOR MARKET RESEARCH, File 761, produced by Datamonitor, London, U.K., contains over 1,000 reports on the United Kingdom and European markets. The major emphasis is the consumer products market, emphasizing food, personal products, household products, leisure, and retailing. European reports include petrochemicals, paper, hardware, software, telecommunications, transportation, and finance.

EUROMONITOR MARKET RESEARCH, File 762, produced by Euromonitor, London, U.K., contains over 475

*Forthcoming file

in-depth reports, with market and company reports within individual product sectors, covering France, Italy, United Kingdom, Germany, Spain, and the United States. The focus is consumer products, including electronics, food and beverages, cosmetics, household products, leisure goods, financial services, and health care. The retail and automotive markets are covered extensively.

FREEDONIA MARKET RESEARCH, File 763, produced by The Freedonia Group, Cleveland, OH. The Freedonia Group publishes over 600 report titles covering the worldwide industrial market, with extensive business-to-business analysis. Markets include organic chemicals, specialty chemicals, inorganic chemicals, coatings and adhesives, plastics, packaging, paper and textiles, health care, communications, electronics, transportation, environment, and factory automation. Both *TFG Business Research Reports* and *TFB Corporate Intelligence Reports* are included in the file.

NTIS

File 6
Menu
CDROM

Coverage: 1964 to the present

Updates: Biweekly

Data Type: Bibliographic

Provider: National Technical Information Service (NTIS),
U.S. Department of Commerce, Springfield, VA

The NTIS database provides access to the results of U.S. government-sponsored research, development, and engineering, plus analyses prepared by federal agencies, their contractors, or grantees. It is the means through which unclassified, publicly available, unlimited distribution reports are made available for sale from agencies such as NASA, DDC, DOE, HUD, DOT, Department of Commerce, and some 600 other agencies. In addition, some state and local government agencies now contribute their reports to the database.

NTIS also provides access to the results of government-sponsored research and development from countries outside the U.S. Organizations that currently contribute to the NTIS database include: the Japan Ministry of International Trade and Industry (MITI); laboratories administered by the United Kingdom Department of Industry; the German Federal Ministry of Research and Technology (BMFT); the French National Center for Scientific Research (CNRS); and many more.

Akron Beacon Journal

provides news coverage of Akron and Cleveland, Ohio and the surrounding counties. It reports extensively on the rubber industry and on the automotive industry since Ford, GM, and Chrysler have plants in the Akron area.

The Arizona Republic

from Phoenix is the largest newspaper in Arizona and supplies extensive coverage of local, state, national, and international news. ***The Phoenix Gazette*** is the second-largest Arizona paper and focuses on news of metropolitan Phoenix, Maricopa County, and the state. ***The Arizona Business Gazette*** is a weekly publication covering legal and business news.

Atlanta Journal/Atlanta Constitution

are leading southeastern newspapers providing complete and in-depth local and regional news coverage. Focus is on business, finance, transportation, industry, and trade. Major corporations in the Atlanta area are AT&T, Coca-Cola, Delta Air Lines, Lockheed, General Motors, Ford, and IBM.

The Baltimore Sun

is Maryland's largest general circulation daily and provides comprehensive coverage of local and regional events, issues, people, and industry. It contains news on defense contracts, convention sites, research from The Johns Hopkins University, commercial fishing, agriculture, and tourism.

The Boston Globe

is a general circulation newspaper providing local, national, and international news coverage, with special emphasis on Boston area politics, business, real estate, and high-tech companies.

Buffalo News

provides coverage of local, national and international news with emphasis on higher education, sports, science and medicine, and tourism. In addition, it provides coverage of business including companies located in the Buffalo area, such as Marine Midland Bank, Goldome FSB, and Empire of Americal FSB.

The Charlotte Observer

is a general circulation daily providing local, national, and international news coverage, with major emphasis on industries in the Carolinas, such as banking, construction, textiles, and trucking.

The Chicago Tribune

is a general circulation newspaper providing local, national, and international news coverage; it is considered to be the newspaper of record for the Midwest.

The Christian Science Monitor

provides information on topics such as economic news, politics, media issues, education, and the arts. Regular sec-

tions include The World, The U.S., The Economy, Media, Learning, The Home Forum, Opinion, and Editorial. In addition, News Currents gives a brief overview of news and events that shape the nation and the world.

Cincinnati Post/Kentucky Post

provide news coverage of southwestern Ohio and northern Kentucky. They cover companies based in the environs including Procter & Gamble, Heinz Pet Products, Columbia Sussex, Levi Strauss, Delta Air Lines, American Sound, and many more.

The Columbus Dispatch,

Ohio's second-largest newspaper, provides general coverage of the news, with special emphasis on banking, insurance, research and information, and business franchises.

***Commercial Appeal* (Memphis)**

is the only general circulation daily and Sunday newspaper for the Memphis metropolitan area. Emphasis is given to medicine, tourism, sports, and business. Companies headquartered in the Memphis area are also monitored, including Federal Express, Cleo, Northwest Airlines, Schering-Plough, and International Paper.

The Daily News of Los Angeles

is a general circulation newspaper emphasizing high technology, banking, petroleum, aerospace, entertainment, insurance, and the large local universities, USC and UCLA.

The Detroit Free Press

provides local and international news coverage and, since Detroit is the hub of the U.S. automobile industry, reports extensively on that industry and accompanying labor issues.

The Houston Post

covers local Texas issues including politics and government, business, and economy, and places special emphasis on the Johnson Space Center, space missions, and the effects of NASA programs on the Texas population and economy.

Lexington Herald-Leader

provides complete coverage of local Lexington news, as well as Kentucky state government news. It also highlights important employers in the state, such as Toyota and the University of Kentucky.

The Los Angeles Times

provides comprehensive coverage of California and the Pacific Rim, and in-depth coverage of world and national

news, with particular emphasis on industries in the Los Angeles metropolitan area, such as aerospace, entertainment, banking, high technology, real estate, and Far East trade.

Miami Herald

includes in-depth coverage of Latin American and Mideast issues, as well as local coverage of business and economy, sun-belt agriculture, education, and government. Businesses located in the Miami area include Burger King, Carnival Cruise Lines, Citizens Savings, Florida Power and Light, and Knight-Ridder.

The New Orleans Times-Picayune

is a general circulation newspaper emphasizing Louisiana's agriculture, aerospace, chemicals, marine, music nuclear, oil, seafood, shipping, and tourism industries.

Newsday and New York Newsday

include in-depth information on New York City municipal government and the political administration of urban, suburban, and rural communities. Coverage of retail sales and the manufacturing industry is extensive.

***The Oregonian* (Portland)**

provides extensive coverage of Southwest Washington, Oregon, and Portland metropolitan areas, with focus on the economic climate of Oregon and the Pacific Northwest.

Orlando Sentinel

focuses on tourism and attractions, including Epcot Center, Disney World, Sea World, and Cypress Gardens. Major companies located in the Orlando area include General Mills Restaurant Group, Harcourt, Brace, Jovanovich, and AT&T.

Palm Beach Post

is a general circulation newspaper providing complete coverage of people, companies, industries, issues, events, and sports in Palm Beach. The Post is a prime source of information on the Palm Beach metropolitan area and the Treasure Coast.

Philadelphia Daily News

provides access to the general circulation newspaper of the same name, rated second in the U.S. for sports coverage. It offers strong local and some national coverage. Extensive coverage of Philadelphia politics, industry news, crime and crime prevention, education, banking, and transportation is provided.

The Philadelphia Inquirer,

a Knight-Ridder publication, offers extensive reporting on Philadelphia and the nine county Pennsylvania-New Jersey metropolitan area. Emphasis is on Philadelphia's insurance, banking, education, legal services, hospital and health care services, transportation, and cultural arts.

The Pittsburgh Press

is a general circulation newspaper serving readers in Pennsylvania, Ohio, West Virginia, and Maryland. Emphasis is given to local companies and general subjects such as business, medicine, technology, religion, transportation, and the arts.

***Plain Dealer* (Cleveland)**

focuses on regional and state issues, providing coverage of area industries, businesses, hospitals, education, culture, and politics. Industries supporting the area include tool and die, automotive, and service. Extensive coverage is also available on the 27 Fortune 500 companies headquartered in Cleveland, including TRW Inc., Eaton Corp., BF Goodrich Corp., American Greetings, Figgie International, and GenCorp.

Richmond News Leader/Richmond Times-Dispatch

provides comprehensive city, regional, business, sports, and state government news. Businesses in the area are Bank of Virginia, A.H. Robbins, Reynolds Metals, E.I. DuPont, Philip Morris, and Best Products.

The Rocky Mountain News

is Colorado's oldest newspaper providing coverage of aerospace, agriculture, broadcasting, computer technology, manufacturing, mining, energy, telecommunications, and other industries located in the state.

The Sacramento Bee

is a general circulation newspaper serving the counties of inland Northern California from Sacramento County on the south to the Oregon border on the north. It focuses on business news, stock market coverage, and because Sacramento is the capital, it provides extensive coverage of state government news.

The San Francisco Chronicle

provides extensive coverage of the San Francisco Bay Area as a major center for corporate headquarters, government agencies, Pacific Rim trade, and high technology industries.

San Francisco Examiner

is a general circulation newspaper providing local, national, and international news with comprehensive coverage of the San Francisco Bay Area. Focus on local issues include California wineries, California environment, Pacific Rim trade, and the biotechnology industry. Extensive coverage is included for area companies including Amdahl, Apple Computer, Gap Stores, Genentech, Syntex, and Wells Fargo Bank.

The San Jose Mercury News,

a Knight-Ridder publication, features coverage of entrepreneurial and industrial activities in "Silicon Valley," and issues of particular interest to Californians in general.

The Seattle Times

provides award-winning coverage of national, international, U.S. Northwest, and Pacific Rim news. Local businesses, such as Boeing and Microsoft, receive thorough coverage as well.

The St. Louis Post-Dispatch

is a general circulation newspaper that provides coverage of industries located in the St. Louis area, including financial services, beverages, agriculture, chemistry, aerospace, defense, automobiles, and more.

St. Paul Pioneer Press Dispatch

specializes in government and political reporting. Special emphasis is placed on business and sports. The paper covers St. Paul and Minneapolis, which are corporate headquarters for such firms as 3M, Cargill, Control Data, General Mills, Honeywell, and Pillsbury.

St. Petersburg Times

serves Florida's Gulf Coast with special emphasis on agriculture, mining, the environment, and tourism, and recreation. Business coverage includes major local employers such as Barnett Banks, Florida Progress, TECO Energy, Florida Steel, and the Home Shopping Network.

***Star Tribune* (Minneapolis)**

provides the latest news from the Minneapolis-St. Paul metropolitan area. Special attention is given to high technology, the food processing industry, business, and sports.

***State* (Columbia)**

is the largest newspaper in South Carolina. Concentrating on South Carolina government, it also provides coverage of the textile industry, agribusiness, and companies headquartered in the area, such as J.P. Stevens and Michelin.

Sun Sentinel (Fort Lauderdale)

provides in-depth coverage of the South Florida Coast area. This paper provides extensive reporting of South Florida agriculture, business, the fast-growing construction and housing markets, international banking, sports and recreation, tourism, and medical and retirement information.

Times-Picayune (New Orleans)

is Louisiana's largest newspaper and offers detailed coverage of the New Orleans area. Industries covered include oil, aerospace, shipping, nuclear energy, and tourism. Businesses covered include Avondale Ship Yards, Martin-Marietta, Dillard's, and South Central Bell Telephone.

Times Union (Albany)

provides news coverage of Albany, capital of the state of New York. The paper's focus includes government news; local industries, such as General Electric; and recreational areas, such as the Adirondack and Catskill mountain resorts.

USA Today

provides coverage of news stories from all over the United States and is distributed in all 50 U.S. states and 80 countries. Stories of both local and national interest are included.

The Washington Post

provides national political coverage and in-depth investigative reporting of government policies and operations in Washington, DC, and around the world.

The Washington Times

provides coverage of government issues, international affairs, the environment, health and social issues, the arts, sports, and entertainment, and also focuses on businesses located in Washington, DC, such as MNC Financial and Allied Research.

Wichita Eagle

is a general circulation newspaper serving Wichita and south-central and western Kansas. It provides extensive coverage of local and state government activities and hospitals and other health care facilities in the area. Businesses in the Wichita area that are covered include Air Midwest, Beech Aviation, Cessna Aircraft, Coleman Company, Koch Industries, Learjet, Pizza Hut, and Sheplers.

All newspapers include the cover-to-cover full text of all news stories, features, editorials, and wire stories. Items such as classified ads, sports statistics, fillers, and certain minor items are excluded.

PASCAL

File 144 Menu

Coverage: 1973 to the present

Updates: Monthly

Data Type: Bibliographic

Provider: CNRS/INIST, Institut de l'Information

Scientifique et Technique, Vandoeuvre-les-Nancy, France

PASCAL is a multidisciplinary database equivalent to the 79 print *Pascal* journals. Literature from international sources is indexed and abstracted, including journals, doctoral and masters theses, reports, conference proceedings, and books. Some patents are included in the area of biotechnology. Major subjects covered include: life sciences, biology, and medicine; chemistry, applied chemistry, and pollution; energy; metallurgy, mechanical and civil engineering; transportation; food and agricultural sciences; earth sciences; physics and space sciences; and computer sciences and engineering. The file is bilingual (in French and English) and approximately 50% of the records have abstracts. In addition, records added from 1977 forward have Spanish keywords.

QUOTES (see DIALOG QUOTES AND TRADING™)

QUOTATIONS DATABASE

File 175
Menu

Coverage: Biblical times through 1979
Updates: Closed file (other sources to be added)
Data Type: Complete-text
Provider: Dialog Information Services, Inc., Palo Alto, CA

QUOTATIONS DATABASE is an omnibus file of literary, political, and other quotations of note. The file consists of material from the *Oxford Dictionary of Quotations* (ODQ) published by the Oxford University Press. ODQ was originally compiled in the 1930's; the third edition was published in 1979. The database presents brief quotations accompanied by the author's name, birth and death dates, and the source of the quote. Material is drawn from: poets, novelists, playwrights, politicians, public figures, the *Bible*, Vulgate, the *Book of Common Prayer*, the Latin Mass, ballads, Greek and Latin classics, modern European language classics, and famous historical mots, dicta, quips, and utterances.

Initially, the QUOTATIONS DATABASE contains *The Oxford Dictionary of Quotations*. Other quotations sources will be added to the file in the future.

REGISTRY OF TOXIC EFFECTS OF CHEMICAL SUBSTANCES (RTECS®)

File 336

Coverage: June 1971 to the present
Updates: Quarterly
Data Type: Directory
Provider: National Institute for Occupational Safety and Health, Cincinnati, OH

REGISTRY OF TOXIC EFFECTS OF CHEMICAL SUBSTANCES (RTECS®) is a comprehensive database of basic toxicity information for over 100,000 chemical substances including: prescription and non-prescription drugs, food additives, pesticides, fungicides, herbicides, solvents, diluents, chemical wastes, reaction products of chemical waste, and substances used in both industrial and household situations. Reports of the toxic effects of each compound are cited. In addition to toxic effects and general toxicology reviews, data on skin and/or eye irritation, mutation, reproductive consequences, and tumorigenicity is provided. Federal standards and regulations, NIOSH recommended exposure limits, and information on the activities of the EPA, NIOSH, NTP, and OSHA regarding the substance are also included.

SCISEARCH®

Files 34, 434
Menu

Coverage: 1974 to the present
Updates: Weekly
Data Type: Bibliographic
Provider: Institute for Scientific Information (ISI®),
Philadelphia, PA

SCISEARCH® is a multidisciplinary index to the literature of science and technology. Prepared by the Institute for Scientific Information (ISI), it contains all records published in *Science Citation Index* (SCI®) and additional records from the *Current Contents* series of publications that are not included in the print version of SCI. SCISEARCH is distinguished by two important and unique characteristics. First, journals indexed are carefully selected on the basis of several criteria, including citation analysis, resulting in the inclusion of 90 percent of the world's significant scientific and technical literature. Second, citation indexing is provided, which allows retrieval of newly published articles through the subject relationships established by an author's reference to prior articles. SCISEARCH covers every area of the pure and applied sciences.

THOMAS REGISTER ONLINE®

**File 535
Menu
CDROM**

Coverage: Current

Updates: Twice a year

Data Type: Directory

Provider: Thomas Publishing Company, Inc., New York, NY

THOMAS REGISTER ONLINE corresponds to the *Thomas Register of American Manufacturers*, for over 80 years the premier source of product information for North American manufacturing companies. In addition, the online file lists the 44,000+ companies covered in the *Thomas Food Industry Register*, which has been the food industry's most comprehensive national buying and selling guide for over 93 years. The combined file covers over 194,000 U.S. and Canadian companies, both public and private, classified under more than 53,000 product classes and more than 115,000 brand names.

Each record includes company name, address (including county and region), and telephone number, SIC (Standard Industrial Classification) codes, and products and services provided. Trade names (with descriptions) are available for many companies. More than 100,000 records include fax numbers, and many records also list telex and cable addresses, asset rating or annual sales, number of employees, exporter status, names of parent/subsidiary companies, description of business, recent name change

information, and information on markets and customers served. Where applicable, ADI (Area of Dominant Influence) and MSA (Metropolitan Statistical Area) classifications are also included, and "high tech" company and product descriptions are augmented with additional details from other Thomas publications.

TRADEMARKSCAN®—U.K.

File 126 Menu

Coverage: 1876 to the present
Updates: Weekly
Data Type: Directory
Provider: Thomson & Thomson, North Quincy, MA

The TRADEMARKSCAN®—U.K. database, produced by Thomson & Thomson, contains information on all actively registered trademarks and service marks recorded at the Trade Marks Branch of the Patent Office of the United Kingdom. Both used and proposed-to-be-used marks are included, as are new applications for registration. Inactive, or lapsed, marks are also included. As with the TRADEMARKSCAN®—U.S. FEDERAL and U.S. STATE databases (Files 226 and 246) of U.S. trademarks, the TRADEMARKSCAN®—U.K. database should be used as a preliminary screening tool for checking the availability of a new product or service name. If no identical or similar marks are found in the database, further searching, including unregistered, common law marks, is always recommended before a new mark is adopted. In both the U.S. and the U.K., it is not necessary to register a trademark, although registration does afford a greater degree of protection from infringement.

TRADEMARKSCAN®—U.S. FEDERAL

File 226 Menu CDROM

Coverage: 1884 to the present
Updates: 2 times per week
Data Type: Directory
Provider: Thomson & Thomson, North Quincy, MA

The TRADEMARKSCAN®—U.S. FEDERAL database covers trademarks and service marks. The database, produced by Thomson & Thomson, provides information on all active registered trademarks and servicemarks and applications for registration filed at the U.S. Patent and Trademark Office (PTO). Pending applications include both actual-use and intent-to-use applications. The database has been designed primarily as a fast screening tool for checking the availability of new product or service names. Cross-references have been added to assist retrieval of corrupted spellings and unconventional presentations of words.

Each record contains the trademark, the U.S. class number, inter-

national class number, the owner's name, a description of the goods or services, and other pertinent information about the status of the mark.

TRW BUSINESS CREDIT PROFILES

File 547 Menu

Coverage: Current

Updates: Weekly

Data Type: Directory

Provider: TRW Business Credit Services, Orange, CA

TRW BUSINESS CREDIT PROFILES, produced by TRW Business Credit Services, contains the payment history, bankruptcy, tax and legal history, UCC filings, and banking relationships, as well as key facts such as Standard Industrial Classification (SIC) codes, sales ranges, and more. The file contains approximately 2,500,000 companies, including 10,000 public company records that also have financial information provided by Standard and Poor's Corporation.

TRW BUSINESS CREDIT PROFILES covers both public and private U.S. companies, representing commercial as well as industrial establishments from all product areas, as identified by 1987 Standard Industrial Codes. Records contain at least two of the following elements: identifying information (SIC code and telephone number), bank data, supplemental data, key facts data, S&P data, legal data, government data, or trade data. A small percentage of the records contain information on bankruptcies, tax liens, and judgments.

U.S. COPYRIGHTS

File 120
Menu

Coverage: January 1978 to the present
Updates: Weekly
Data Type: Directory
Provider: U.S. Copyright Office and Dialog Information Services, Inc.

U.S. COPYRIGHTS, produced by Dialog Information Services, Inc., provides access to registration details for all active copyright and mask-work registrations on file at the U.S. Copyright Office. The database has been designed primarily as a fast screening tool for checking the ownership and registration status of a particular work. The database is also useful for checking a particular individual's or entity's portfolio of registered works. The data base contains two types of records: monograph records and legal document records. Monograph records contain information on the initial registration and renewal of a work. Legal document records contain information on assignments and other information pertaining to the ownership status.

Subject Access to DIALOG Databases

DIALOG offers two multiple-file search options: DIALINDEX® and OneSearch®. As a first step, use DIALINDEX (File 411) to search ALL or smaller collections of database indexes to identify the DIALOG databases with the most information on your search topic. Then, conduct a comprehensive search in those files using OneSearch. Use OneSearch to conduct a full search of a collection of related databases (up to 60 files), browse the indexes, display records, or use any of the available system features, such as duplicate detection.

Using DIALINDEX

BEGIN 411 and use the SET FILES (or SF) command to choose a supercategory, a category, a list of files, or a combination of the two, e.g.,

```
SET FILES REGIONAL
SET FILES REGIONAL, 15
SET FILES REGIONAL, 15 not 603
SET FILES 15, 16, 75
```

The SELECT statement is then executed against all designated files (no sets are created). You can BEGIN a OneSearch from DIALINDEX by specifying file numbers or the N numbers in the ranked list:

```
BEGIN N1-N3    (search the top three files)
BEGIN 15,16,75 (to search files of your choice)
BEGIN HITS     (search files with record count of 1
               or more)
```

Using OneSearch

OneSearch collections provide access to databases containing similar information. Simply use the BEGIN command with a category, group of files, or any combination, e.g.,

```
BEGIN REGIONAL
BEGIN REGIONAL, 15
BEGIN REGIONAL, 15 NOT 603
BEGIN 15, 16, 75
```

The SELECT statement is then executed against all designated files. Search results can be viewed using TYPE, DISPLAY, or PRINT commands. In bibliographic files, duplicate records may be removed using the DIALOG duplicate detection feature.

To locate a particular acronym in the listing, consult the Acronym Index on page 165. For more information on DIALINDEX or OneSearch, refer to *Searching DIALOG: The Complete Guide*.
